Whatever you do, never lose sight of the Big Picture

We realize the world of project portfolio management is a complex and intricate one. Managing a tangled network of interdependent undertakings, projects, and tasks can be an overwhelming challenge even to the most experienced PMs. Recognizing the need for tools facilitating both project and project portfolio management (PPM), we have imagined and brought to life BigPicture—a genuinely versatile application to optimize your work, ensure enhanced results and save precious time.

Highly flexible and scalable, our app has everything you need to comprehensively plan your undertakings, make adjustments, lead teams, set priorities, coordinate resources, distribute workloads, detect and respond to risks, supervise performance and track progress. Suitable for enterprises and industries of all sizes and fully integrated with Jira software—while also compatible with Trello, Slack, Confluence and others—our solution will foster effective project collaboration and improve your team’s productivity.

Whether you are using agile, waterfall or a blend of PM methodologies, BigPicture is a useful and efficient tool which will immensely increase the efficiency in which your projects are managed and ensure first-rate implementations across your organization.
ENVISIONED WITH PASSION  DESIGNED WITH JOY  BUILT WITH COMMITMENT
BigPicture’s Portfolio Overview is flexible enough to help you build any portfolio structure you can think of, such as portfolios, sub-portfolios, programs, projects, stages, SAFe® Product Increments (PIs), and more. Whatever your methodology, you can effortlessly optimize your set of undertakings and regularly track work progress. You can simultaneously monitor how things are advancing at high and granular levels.

FLEXIBLE PORTFOLIO MANAGEMENT
Smoothly plan and decompose your portfolio’s structure

HIERARCHY
Define your desired multi-level portfolio hierarchy, e.g., portfolios, sub-portfolios, programs, projects, and stages.

ADJUSTABLE APPROACH
Choose from pre-configured templates: Waterfall, Agile, SAFe®, Hybrid, and more.

METRICS TRACKING
Track key aggregated portfolio indicators with ease

ALTERNATIVE SCENARIOS
Compare different roadmap scenarios and see which of them are worth investing in

Most project managers deal with an array of methodologies. From agile to waterfall, with anything in between, it’s useful to keep track of all your teams and tasks in one workplace. Our Gantt module is there to lend a helping hand! This plugin allows you to keep a portfolio-level view of all your projects easily. Whatever your chosen framework, Gantt can be tailored to work for your specific needs.

**AUTO-SCHEDULING**

Identify your project’s stages, milestones and task dependencies and let BigPicture do the scheduling for you.

**AGGREGATES**

Automatically calculate aggregated field values for reporting purposes.

**BASELINES & CRITICAL PATH**

Don’t risk derailing your project; keep it on track with baselines and critical path options.

**WORK BREAKDOWN STRUCTURE**

Break down your scope into an automatically-generated, multi-level Work Breakdown Structure.

**FILTERS**

Drill up and down to the desired level of detail so you can see the project’s particulars or a bird’s eye overview.
Reporting and planning have never been this easy! The WBS (Work Breakdown Structure) of your project, multi-level hierarchies, quick filters, and advanced aggregation make Scope a perfect tool for every PM working in any methodology—or no methodology at all.

**SCOPE DECOMPOSITION**
Visualize your project’s task hierarchy and structure

**FLEXIBLE STRUCTURE PLANNING**
Free yourself from the constraints of a 3-level (Epic → Story → Subtask) framework and set up a customized multi-level structure

**EXCEL-LIKE EDITING**
Click on any Scope cell and work on your tasks in a hassle-free, efficient and elegant way

**EASY REPORTING**
Freely arrange columns, switch between views, and show aggregated values; Scope is an excellent tool for reporting

**ADAPTABILITY OF VIEW**
Filter and single out scope data according to your criteria or use predefined Quick Filters to see your specifics, such as Epics, unresolved tasks, tasks assigned to a only particular resource only, etc.

Appropriate allocation of resources is crucial in any project. Ever-changing circumstances very often necessitate a flexible approach to workload planning to ensure that adjustments are put into place and that the project runs smoothly. Our tool allows you to analyze the availability of your resources (teams and skills), assign and schedule particular tasks and update capacities automatically.

**CAPACITY ANALYSIS**
Identify available resources across the organization to select talent that best fits your project

**REALISTIC CAPACITY ALLOCATION**
Immediately identify instances where your teams and resources become over-allocated

**THOROUGH PLANNING**
Make both short- and long-term plans just as easily

**TEAM CAPACITY**
Monitor capacity on both individual and team levels

**TIME VALUES & STORY POINTS**
Manage your resources the waterfall, agile or hybrid way
RESOURCES ADMINISTRATION

- Customize your workload and holiday plans on company, team, or individual levels
- Register absences of resources
- Define the core competencies of your resources and do skill-based planning
- Use BigPicture and Tempo together

RESOURCES ON GANTT

- Analyze the correlation between project schedule and resource capacity
- Test different scenarios for project scheduling
- Automatically calculate capacity allocation
FLEXIBLE CAPACITY PLANNING

Based on actual resource availability; no guessing or false estimating

Allows for setting capacities individually or on a team level

Full flexibility for planning team capacity in any timebox, e.g., sprints
Up your planning game with this exciting, new module! Board lets you plan with multiple teams and on multiple levels. Give it a try whether you work in sprints or Program Increments (PIs). While fully compatible with SAFe®, our tool is flexible enough to accommodate any methodology you can think of!

**TEAMWORK**
Break free from ‘one team, one board’ constraints; analyze and plan the scope of work for multiple people at once

**DEPENDENCIES**
Establish and track cross-team task dependencies and identify risks well in advance

**SCALE UP OR DOWN**
Plan your Epics, Features, and Stories at different levels

**BACKLOG+**
Effortlessly plan and decompose your scope of work with the help of a new, intuitive backlog feature

**CHARTS**
Measure and report your team’s performance on multiple levels with this useful charting functionality
Designed and developed with Scaled Agile Framework (SAFe®) in mind, BigPicture’s Board module offers unprecedented flexibility. The feature is fully configurable to accommodate a variety of project and portfolio management approaches. Be it waterfall stages, scrum sprints, agile iterations, product increments or other timeboxes, you can always smoothly analyze, plan and adjust while never losing sight of who’s doing what and when!
BigPicture’s fully SAFe®-compliant Roadmap module helps you manage your Program Increment objectives and iteration goals effectively. Versatile as it is, Roadmap will prove equally useful for waterfall and hybrid approaches, allowing you to set targets for all undertakings, such as projects, programs, portfolios, stages, and iterations. With its useful drill-down feature, you can see your entire project or zoom in to a specific phase exactly as your needs dictate.

**OBJECTIVE PRIORITIZATION**
Define your Objectives’ Planned Business Value and select the ones that bring maximum benefit.

**AGILE ROADMAPPING**
Specify the objectives of your teams at multiple levels: iterations, Program Increments (PIs) or whole projects.

**LIGHTBOX**
Easily enlarge a set of objectives of your choice for presentation purposes.

**SMART TRACKING**
Determine Actual Business Value and monitor how your Objectives are attained.

**REPORTS**
Instantly check how your teams are performing against their objectives, period by period.
Dramatically evisculate next-generation...
Once a project is fully scheduled and underway, some tasks demanding particular attention will be noted either because they are known for causing trouble or simply due to their high importance. This could all be jotted down on a sticky note or just remembered. It is best, however, to use the Risk matrix module of BigPicture to keep things tidy and usable.

The Risks component of BigPicture allows a matrix to be designed to show a visual representation of sensitive issues.

**RISK CALCULATION**
Attach values to your Risks to calculate their probability and define their potential consequences

**ROAM**
Assign your risks and track their ROAM status (Resolved, Owned, Accepted, Mitigated)

**REGISTRY & RISK MATRIX**
View all your risks in the register or risk matrix with heatmap functionality

**ADJUSTABLE VIEW**
Effortlessly arrange columns as you see fit and get a view customized for your particular business case

**CARD+**
Configure your risk cards to display all the information you need
BP-83 Authoritatively syndicate compelling core competencies

BP-78 Progressively synthesize wireless alignments

BP-89 Quickly productivately maintainable ideas
Big organizations have it complicated. Juggling multiple undertakings such as projects, portfolios, programs—which are often arranged in an intricate network of connections—is a challenge. This is where our Enterprise solution comes into play! No matter how many teams, goals, and deadlines you’re managing, you can always stay on top of your game with BigPicture Enterprise for more sophisticated infrastructure, added functionalities, ample integration with Jira apps, Trello, TEMPO and more!

**FULLY ADJUSTABLE STRUCTURE**
With all constraints removed, you can enjoy unprecedented freedom in defining your own types of sub-portfolios, projects, programs, and other undertakings

**SHAPABILITY**
Choose which modules to configure and rename them to match your company’s nomenclature standards

**METRICS**
Analyze portfolio metrics to see a bird’s eye view of your projects’ statuses

**CROSS-PROGRAM VIEW**
Check resource allocation across different project teams to always know actual capacity

**INTEGRATION WITH TEMPO**
Save time synchronizing your teams’ Workload or Holiday plans with TEMPO plugins
AVAILABLE WITH AN ACTIVE BIG PICTURE INSTANCE

TRAINING

Make your team feel confident and comfortable using BigPicture! Join hundreds of satisfied customers and companies from all around the world trained by SoftwarePlant’s Atlassian-Certified professionals! Whether you want to know more about BigPicture, need additional training for your team, or need help setting up and customizing your instance, we are there for you! Project Portfolio Management has never been so easy and efficient with our team on hand and ready to help you out.

For more information visit www.softwareplant.com/training or contact us at training@softwareplant.com!

NUMEROUS TEAMS WORLDWIDE IMPRESSED WITH QUALITY
AGILE, WATERFALL, HYBRID AND SAFe®-COMPLIANT
IDEAL FOR ALL TYPES OF TEAMS AND COMPANIES

“Thanks for organizing a successful training on-site at our office. The trainer was very knowledgeable and patient, and really took the time to understand our processes and answer our questions. In the weeks following the training he has also made himself available for follow-up conversations, questions and feedback, so thank you for the continuing support!”

Nicole Adams - Project Manager, Maps Product Unit at TomTom
“The BigPicture training sessions were very successful with our teams here, and finally we got the overview that we needed! A big thanks to Dastin for his time and also patience as we indeed had a lot of questions, suggestions and we need to self-introspect on our methodologies as well. We would also need to continue these training sessions with the other teams at Wirecard Aschheim. Thank you!

Radhika Radhakrishnan - Principal Process Engineer at Wirecard Issuing Technologies GmbH

“Thank you so much for training our team on BigPicture usage. (...) We learned much and are already implementing much of what was learned. Best wishes to you, and we hope to meet again! Oh, and thank you again for the script—what a time saver that will be for us!”

Ken Norman - Senior Manager, PMO at Qualifacts

“It should be mentioned that the trainer is very fluent in the application. ‘He is a fountain of knowledge’ could be the most suitable expression, I think. If someone asks me, certainly, I would recommend on-site training, whenever you are going to use BigPicture.”

Susumu Sekiguchi - Project Manager at Rohm Semiconductor GmbH, Finland
SUCCESS STORY: GAMELOFT

Video games have taken modern society by storm, and the gaming industry—mobile gaming in particular—maintains its status as one of the biggest and fastest-growing ones out there. We pride ourselves with having helped one of the giants of the industry to truly up their game!

COMPANY: GAMELOFT

INDUSTRY: VIDEOGAMES

LOCATION: WORLDWIDE

PRODUCT: BIGPICTURE

Comprised of a bunch of enthusiastic and dedicated people who strive to create a fantastic workplace, Gameloft has all it takes to produce the most entertaining games out there. But with more than 5,400 employees deployed around the world, an increasingly busy release schedule, and the entire industry moving at a cutthroat pace, Gameloft started to experience a sense of pressure.

It was ‘move quickly and innovate, or get swept away by the competition.’ They looked for a solution that would give them an edge on the competition and found it: BigPicture.
BigPicture delivered a highly flexible PPM tool in place of multiple spreadsheets, and it made all the difference!

BigPicture made the whole production department’s work easier by allowing for effective high-level and long-term planning (‘macro planning’)

BigPicture reinforced effective communication within the company by providing a platform with data accessible to all from junior to senior management.

BigPicture allowed the 20+ people working in a given team, such as 3D artists, developers, and game designers, to effortlessly track progress against project goals in a synchronized way and view it in real time. No more having to export data from separate boards to spreadsheets!
We are a team of ambitious, talented and creative individuals fascinated by new technologies and firmly committed to providing outstanding value. Our company has seen continuous development and growth since its founding in 2015.

Now, only a few years later, SoftwarePlant’s products have found favor among several million users around the globe. With about 15,000 teams from start-ups to Fortune 500 companies using our solutions every day, we are convinced that our success has been possible due to an unbeatable combination of four factors: modern thinking, a love for technology, meticulous attention to quality, and a drive for constant improvement.

30-DAY MONEY BACK GUARANTEE

If for some reason our products do not satisfy your needs, let us know and we’ll refund you without any hassle!

ATLASSIAN PLATINUM TOP VENDOR

All of our plugins have been through a rigorous review process by Atlassian, who holds vendors to high standards for add-on traction and reliability.

OUTSTANDING SUPPORT

Customers are the focus of our attention, which is why we place great emphasis on competent and timely support.

SAFe® PLATFORM PARTNER

Scaled Agile Framework is one of the most complete and mature PM methodologies inspiring the development of our products.
As a company committed to supporting partnerships and building synergies across the Atlassian Community, we have built a robust network of global partners. Look up your local BigPicture reseller at softwareplant.com/partners and take full advantage of benefits including:

**ASSISTANCE**
Get instant help with setting up and customizing your BigPicture instance

**TRAINING**
Get free product demonstrations and training

**CUSTOM DEVELOPMENT**
Communicate your specific user demands through your local partner
